

Health services collapse in Gaza Strip hospitals

The ministry of Health announced the healthcare services breakdown in the hospitals located in the southern governorates as a result to the intensified targeting and escalation on various life aspects in the Gaza Strip, though the hospitals are still open but no services can or could be provided to the crowds of injured. The Israeli occupation aggregations against the healthcare sector led to the martyrdom of 65 medical personal, and the wrecking of 25 ambulances. 12 hospitals, and 32 health care centers are out of service, and the fear remains that more health care facilities will be inactive as a result of the constant targeting, and the fuel depletion.
