

# Health System Functioning: Gaza

7 October - 6 November 2023

## WASH in health care

**56-96%** less water consumption (25 Oct - 5th Nov)\*

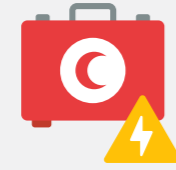

**3500** hospital inpatients at immediate risk from hospital associated infections and outbreaks

## Fuel and electricity for health care

Fuel reserves in hospitals critically low

Essential medical equipment including life support machines depend on hospital electricity generators

## Human resources for health

**16** health workers killed on duty

**37** health workers injured on duty

Health workers face exhaustion; lack of specialists for certain injuries

## Public health situation

**1.5 million** people displaced\*

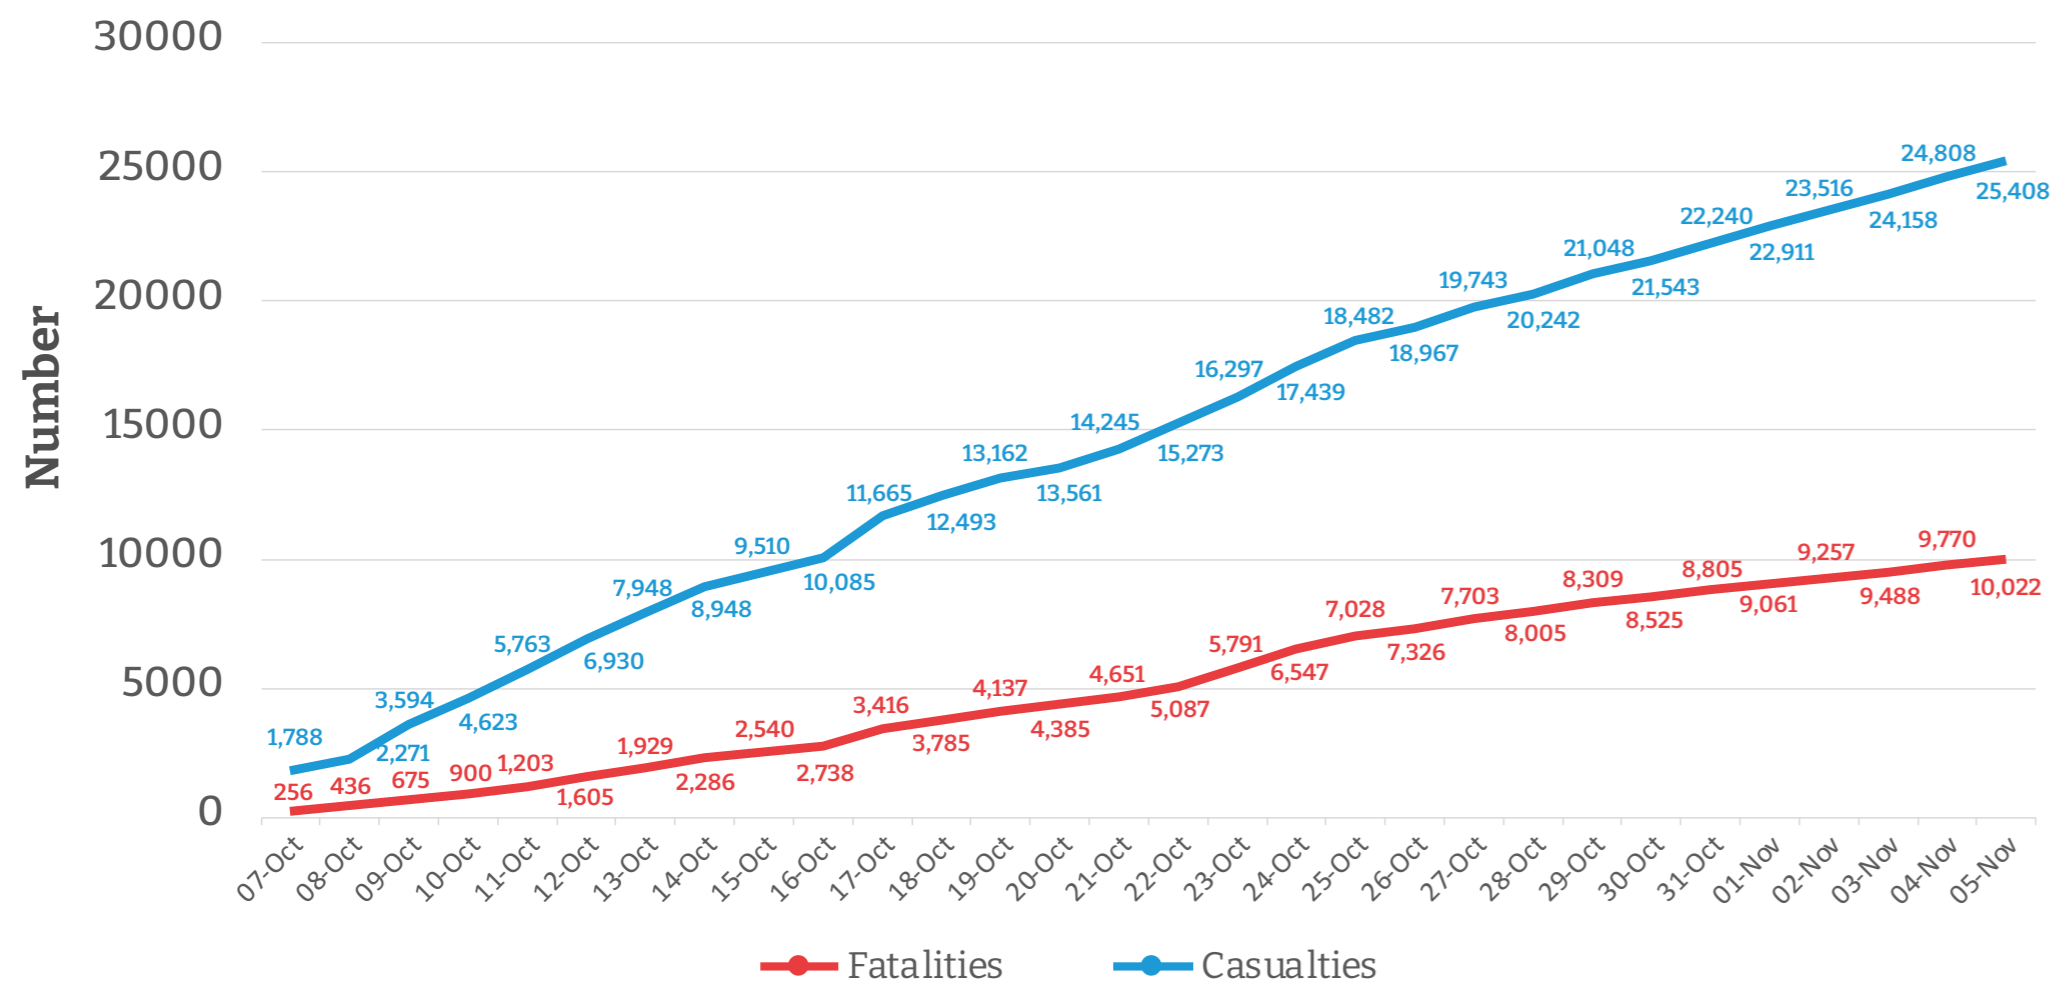

Imminent risk of communicable disease outbreaks

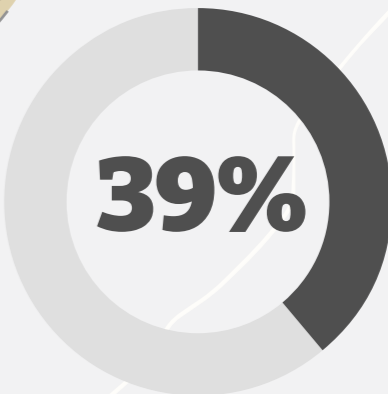

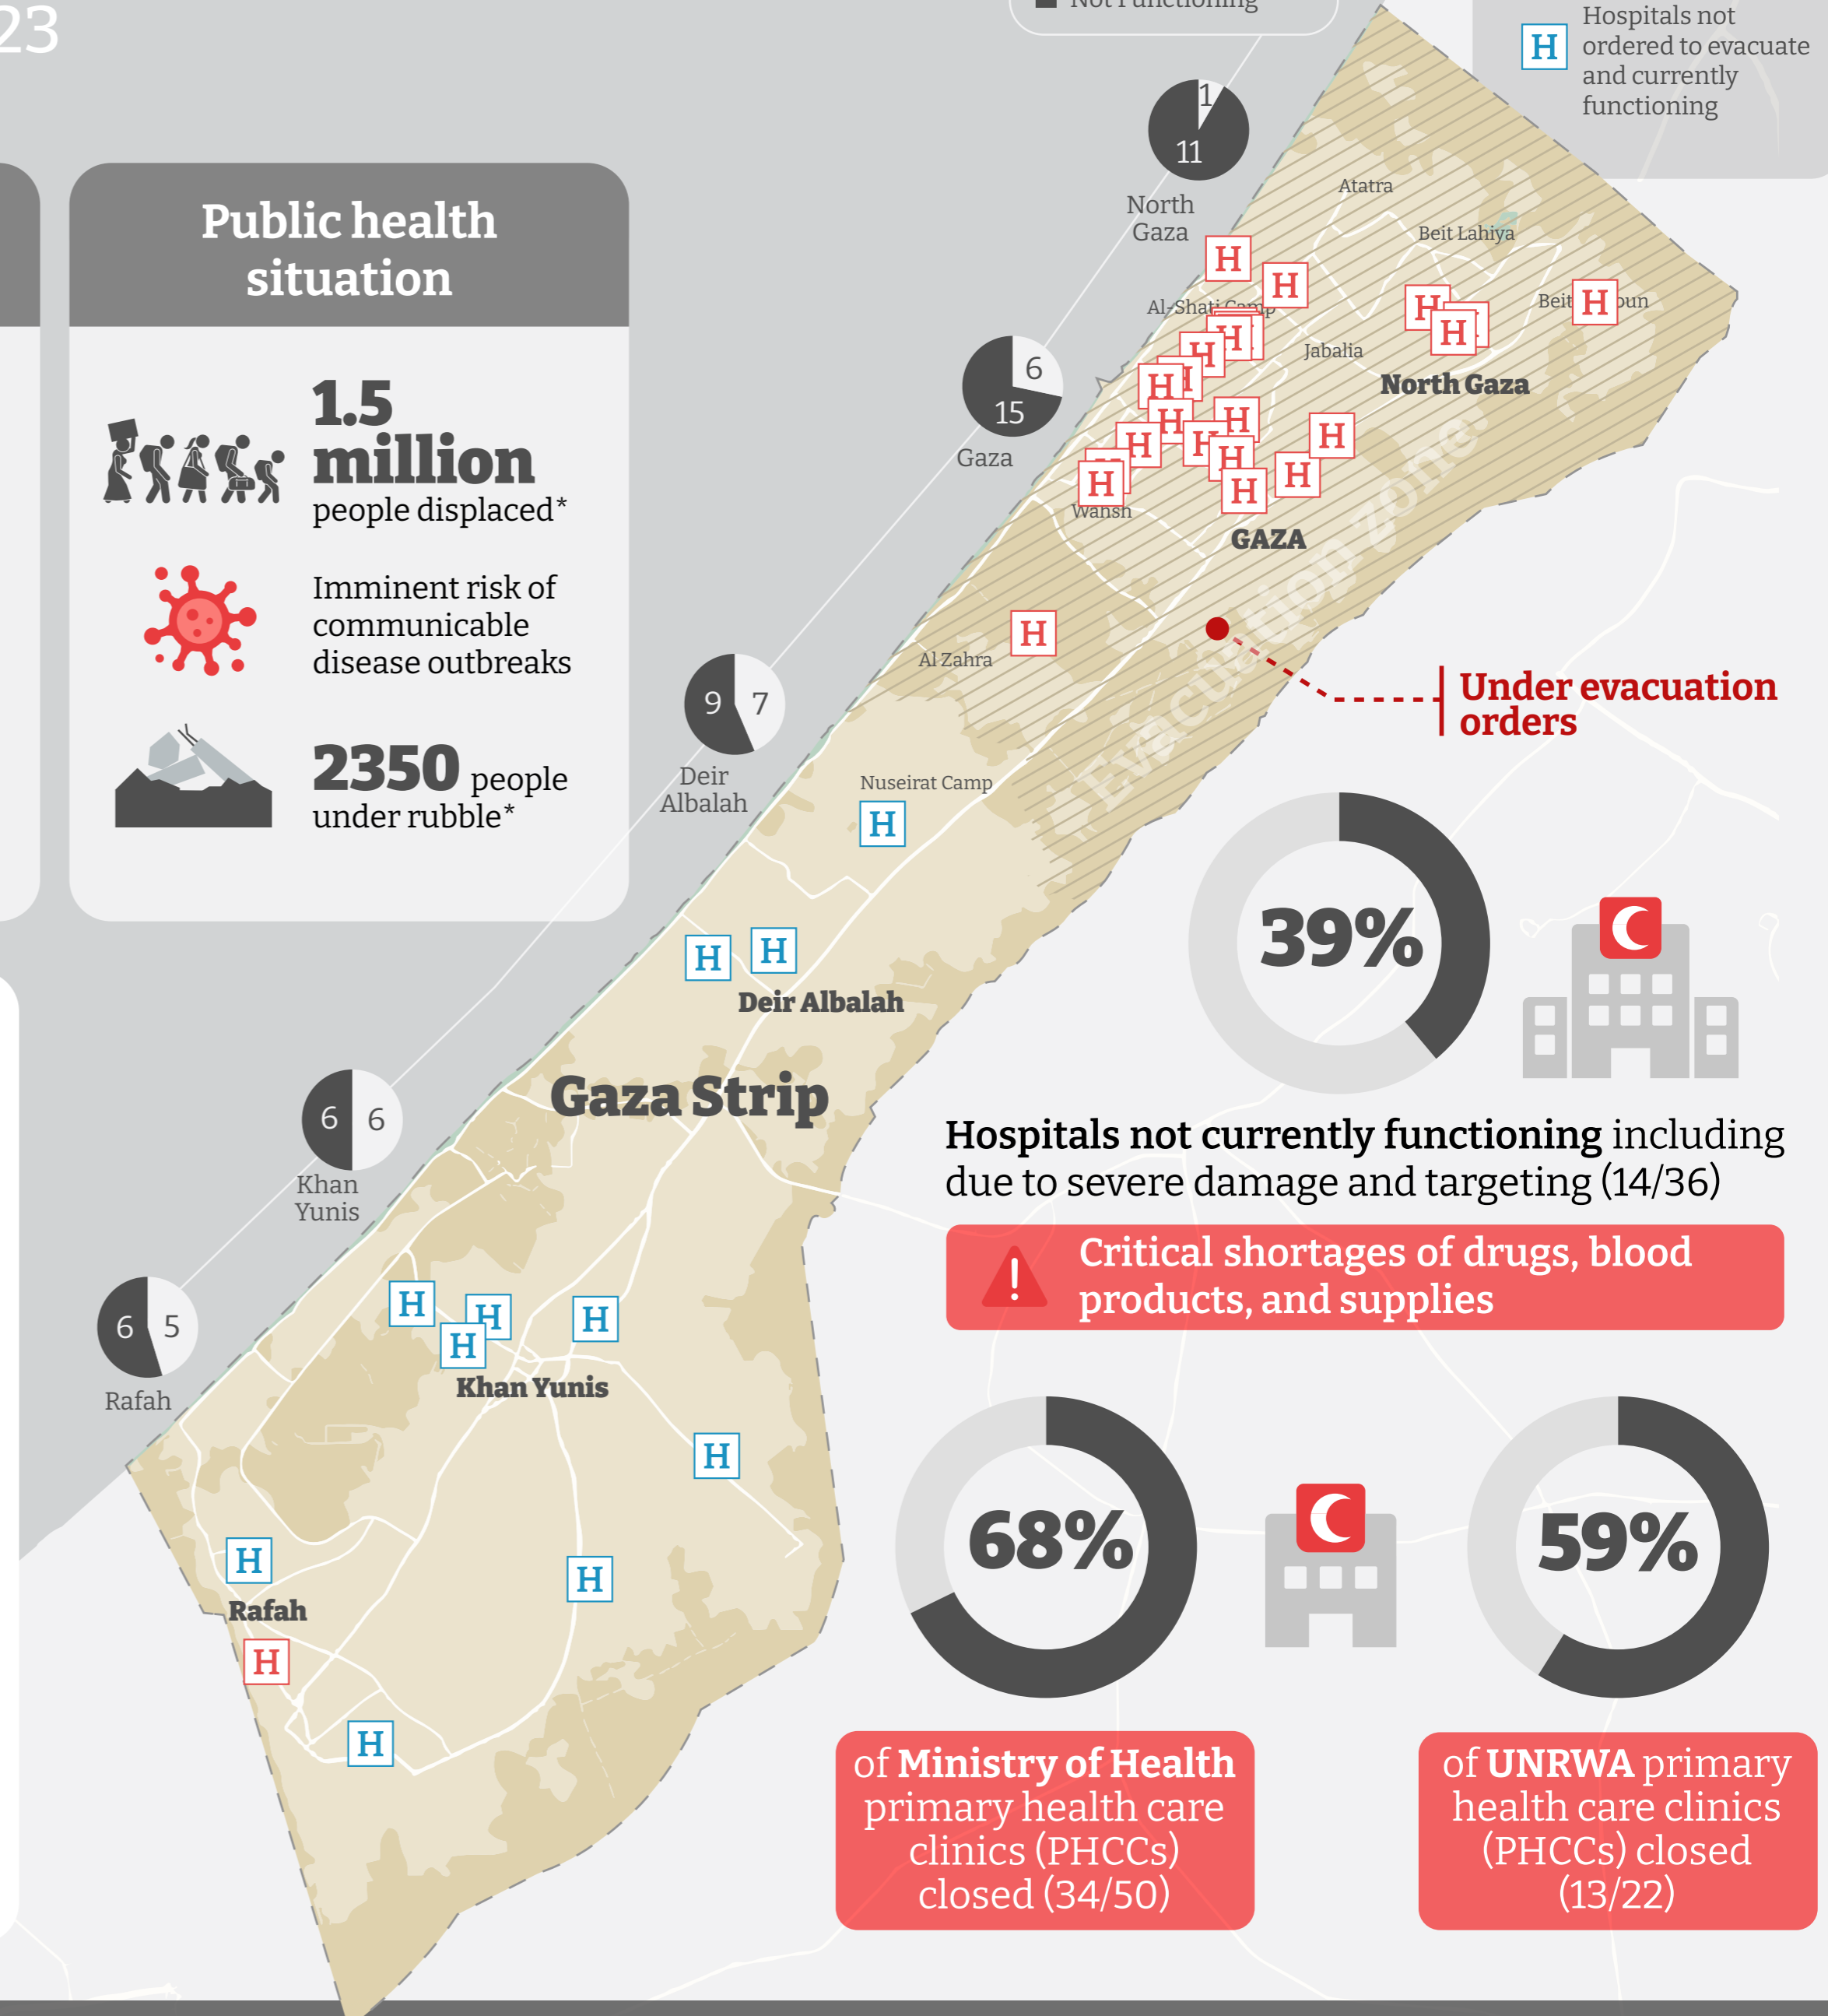

**2350** people under rubble\*

## Cumulative casualties and fatalities\*

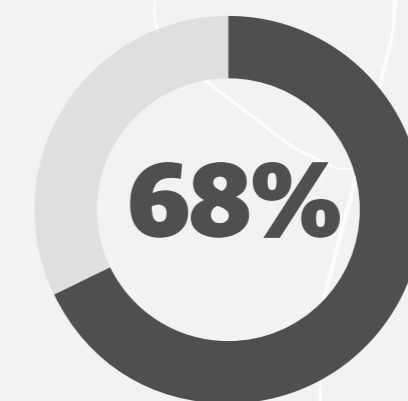

**PHCCs per Governorate**  
■ Functioning  
■ Not Functioning

H Hospitals ordered to evacuate  
H Hospitals not ordered to evacuate and currently functioning
